INSTALLATIONS GUIDE FOR GRIDTRACK

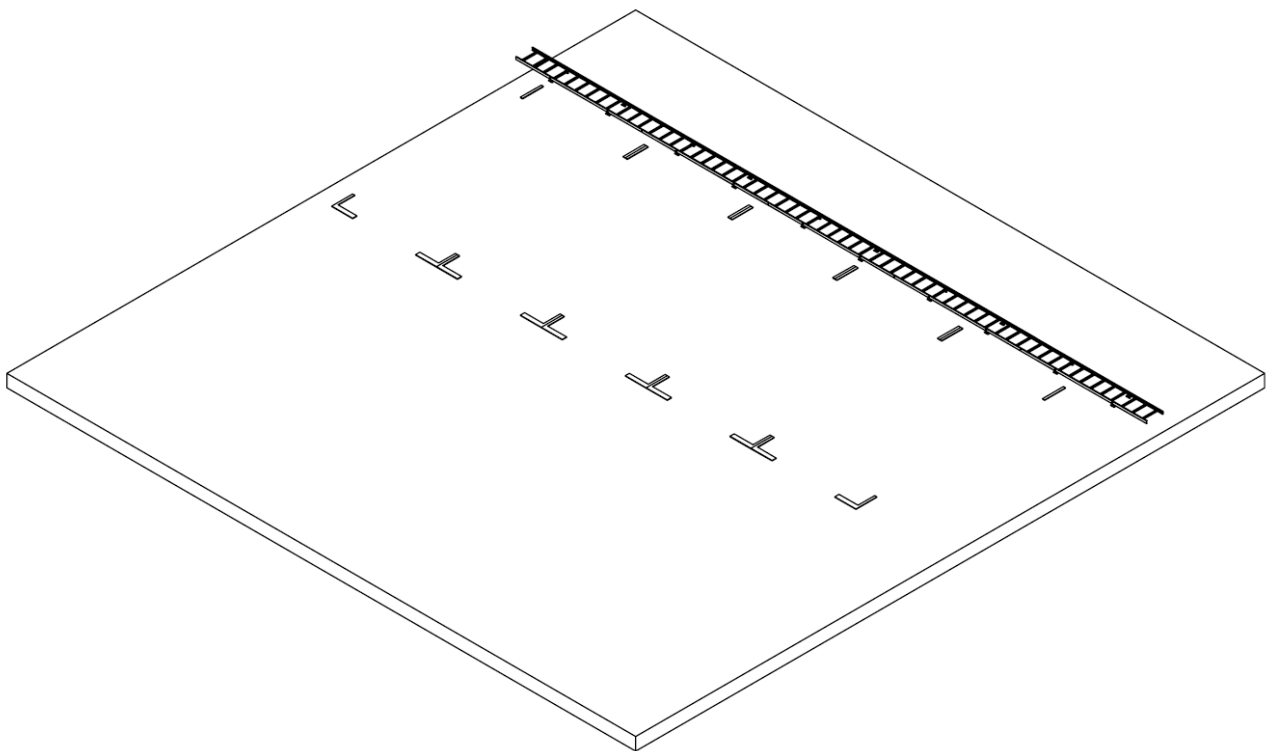

Above ground foundation

COMPONENTS:

	No units	Art. No.	Name
GT Chargin section 1062-6000-0001-60	According to order	1062-0010-0010-6	GT Charging section Stomme
		1062-0010-0060-2	GT Charging section Cover
		1062-0010-0070-1	GT Charging section Cover hind part
		1062-0010-0080-2	GT Carrier
Cable channel 1062-2001-0100-60	Requested length (per meter)	9200-1000-5500-0	Cable ladder MP-105S 3m 500mm
		1062-2001-0001-2	GT Gutter top 2495
		9200-1000-5510-0	Ladder joint MP-108S internal for MP-S cable ladder
		1060-3300-0210-2	Cable fot
		1062-2001-0003-6	GT Gutter top End section (2 pcs. per order are included)
Mounting plate	Quantity and version according to order (showing the most common ones. Plates for other charger brands are also available)	1062-0020-0040-1	GT Mounting plate HYC 300-400
		1062-0020-0010-1	GT Mounting plate KP satellite
		1062-0020-0020-1	GT Mounting plate KP LC
		1062-0020-0030-1	GT Mounting plate HYC 150-200

INSTALLATIONS GUIDE FOR **GRIDTRACK**

Above ground foundation

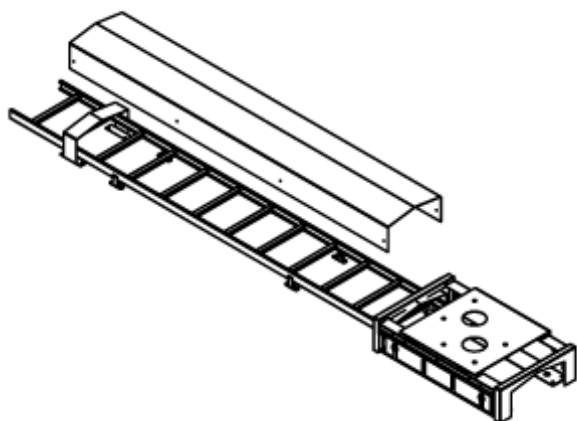

1. Place and assemble cable ladders with associated joint fittings.
2. Install feet and anchor in ground

Rout cabling

INSTALLATIONS GUIDE FOR **GRIDTRACK**

Above ground foundation

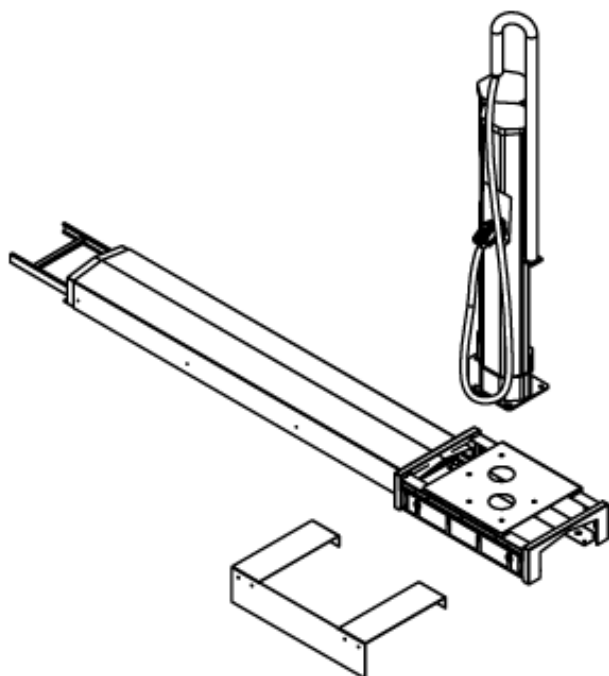

3. Place the Charging sections.

4. and anchor the base. If the surface is sloping, level the frame so that the carrier beams are level.

5. Install the Gutter top. If length adjustment is required on site, cut the Gutter top and "hide" the cut inside the Charging section.

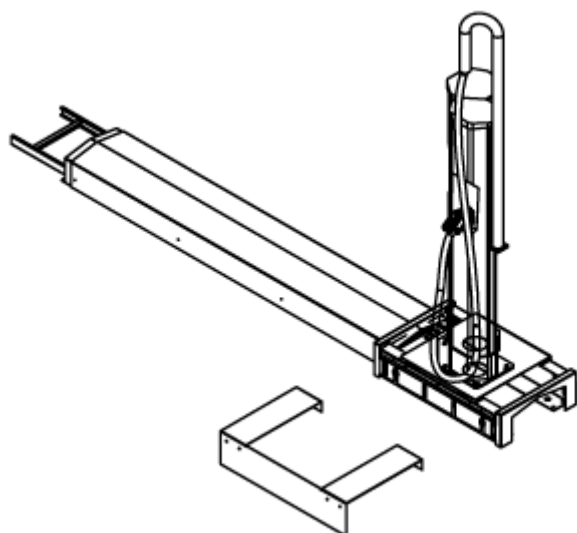

6. Install the channel supports. Adjust the placement according to the length of the Gutter tops

7. Place the Mounting plate and install the charger with through-bolts in the carrier beams.
